Introduction

“Entre Géosciences et Chimie” (EGC) is a seminar series that serve as an interdisciplinary platform for researchers within Materials Chemistry and Geosciences. Since 2015, this event has been organized annually at the University of Yaoundé I main Campus. The latest innovation to the seminar series has been the advent of poster sessions and prizes awards for best oral and poster presentation.

Objectives

The objective of this seminar is to promote the research at the interface of Materials Chemistry and Geosciences both at the local and international level. The event also seeks to bring together academic scientists, researchers and research scholars; to create an open space for discussion, networking and collaboration. Participants get a chance to present their research to colleagues of the same or similar fields, receive positive feedback and constructive criticism about their research.

Themes

Geochemistry

Genesis of geomaterial, Mineralization and Metallurgy

Natural Geomaterials

Characterization, Evaluation and Valorization

Hydrology and water Resources

Water Treatment and Environmental Pollution

Inorganic materials

Composites and Hybrid Materials

Presentation languages

English and French

Call for Abstracts

Proposals for oral and poster presentations in English or French, related to the themes of the seminar are invited. Abstract format, template and submission guidelines will be made available at <http://www.egc-uy1.com/>

Awards
